

## CSN Solutions : Consultancy

CSN Solutions have demonstrated exceptional commercial awareness. We have extensive experience in all areas of IT, change management and customer service. Our specialists can work in partnership with you and your business to help provide the right solution.

### We have considerable experience in the following business positions:

- Management of large and small Companies at senior levels.
- Manufacturing and Distribution.
- IT Management.
- Line Management across a wide range of industry and commerce.
- Project Management.
- Stock System Implementation
- Company and Computer strategy

We can also provide hand-holding or project management, as new systems are implemented and data transferred from old systems. It is important that the existing business is not affected and that customers are able to see the benefits of change in as short a period as possible. CSN have a wealth of expertise in this area and will greatly ease your system change-over.

Yet another service that we can offer is IT Supplier Solutions and Evaluations. If you are considering a large investment in systems and are thinking of changing to a new supplier, there can be a fear of the unknown. CSN have experience in dealing with a number of IT suppliers and would be able to provide an independent review of any proposal. CSN are able to assist in documenting your existing system procedures and future requirements to ensure that any items purchased from an IT supplier meet your company's expectations.

If you would like to speak to us about our Consultancy Services please call **01452 413333**. We will be happy to advise you on how we can best enhance your business plan and future success.
