

CSN Solutions : Networking

Your network is one of your most valued assets in business. You need your network to be highly reliable, able to cope with the data flow that you need and, overall, be cost effective. With our vast experience of network planning, installation and maintenance, CSN Solutions can create the reliable network that you need. We will consult with you at every stage of the process to ensure that the network we build meets your needs without being oversold.

Our Networking service caters for the following:

- Installation of Structured Cabling Systems. ie Fibre, Cat5e etc for Data and Telephones.
- Installation of Wireless Systems.
- Network Consultation, Design and Implementation.
- Supply, install and configure data Switches, Routers and Wireless Devices.
- Diagnosis of all data cable related faults.
- Remote access, allowing users to connect from other locations using Virtual Private Networks through Firewalls or Routers.
- Broadband ADSL communication, Configuration and setup.

We can also supply and fit a range of server solutions:

- Supply, setup and installation of all Servers from stand-alone to load balanced rack mounted units.
- Install and configure all ranges of Microsoft Server Operating Systems.
- Configure secure and reliable backups to fit in with disaster recovery plans.
- Configure anti-virus and anti-spyware to remove external threats to your organisation.
- Workstation supply, install and configure using PCs, Notebooks, Thin Clients or Apple Macs.
- All routine server software such as Internet access, Email, Sage, SQL Server, ISA Server and Faxing.

CSN can help ensure that your network is perfect for your requirements. Call **01452 413333** to arrange a free, no obligation, site visit and follow-up report on your network.
